MEIJER DRIVE

Mayor Chuck Oberlic issued the following update regarding the Meijer Drive Extension Project:

"The City has expended every effort to complete the final stages of the Meijer Drive extension project before the upcoming Memorial Day weekend. However, Mother Nature has not cooperated.

The repeated recent rain storms have hampered work activities such as the final grading of the existing clay soil, the placement of black dirt adjacent to the new roadway and the placement of overhead street lights. Once these items are completed, the final asphalt surface overlay can be placed on the new Meijer Drive roadway and weather permitting, we fully expect the new road to be open to traffic during the week of May 31st."
