Subject: Mayor Press Release on Mosquito Control

MOSQUITO CONTROL IS UNDERWAY

Mayor Charles Oberlie in coordination with the Superintendent of Central Services, James T. Elwell and Vector Control Officer, David Morlan would like the community to know that the mosquito abatement and mosquito control spraying will begin Thursday, June 9, 2005.

There are several ways we can work together to control the Mosquito population in our area. Residents should try to eliminate sites where vector species breed on their property. Water left standing on anything is a place that will breed mosquitoes. Bird baths, old tires, water-filled containers, roof drains, and gutters should be cleaned.

If you have any questions or concerns please contact the Vector Control Department at 873-1500.
