The Michigan City Fire Department is in the process of gathering information on adults and children in the community who have special medical needs. Mayor Ron Meer and Fire Chief Ronnie Martin urge families who use medical care aids such as cardiac monitors, ventilation devices, feeding tubes, wheel chairs, or any other such devices for sustaining the life and health of a family member, to complete the form on the back of this letter and forward to the Fire Department. This form should also be used for community members who are non-ambulatory and would require assistance in leaving their homes in an evacuation situation.

The specific medical information collected will help paramedics, firefighters and police officers in preparing to help citizens in the event that a tornado, evacuation, disaster or any medical treatment is required. The information will be used to create a map of the citizens who have special needs so that Emergency Responders will know quickly where people live that need additional help. This information will assist Emergency Managers in planning a disaster response. The information collected will be for the sole use of the Fire, Police, Emergency Management and Emergency Medical Service (Ambulance) Departments, so they can have a better understanding of the community's needs prior to arriving in the event of an emergency. All information is kept strictly confidential.

This program is only to be used for community members who need assistance and are dependent on life-sustaining devices.

Once you have registered, please make sure to update any and all changes to the Fire Department to help keep our records current so we can better serve our community.

Fire Chief,

Ronnie Martin
